## Oracle. Delivery of software licenses

**Oracle is the world's largest producer of corporate software and hardware products. Oracle is the No. 1 company regarding database management systems, data warehousing technologies and solutions for business analysis, technologies of identification data management, integrated platforms of server applications and solutions for company performance management. It is also the leader in solutions for customer relationship management, human resource management, and supply chains.**

The RDTEX Company sales center delivers licenses for the entire Oracle software product line on the territory of Ukraine. Based on many years of experience on the industry markets and having the knowledge of technologies and business applications, the RDTEX Sales Center specialists correlate customers' requests with their goals and make optimal license specifications taking into account customers' current needs, their business development prospects and licensing rules.
